

It is time that everyone got to use the airwaves. This domination of the broadcasts has left the people with only CNN as an unbiased media outlet. Last night on MSNBC, 5/26/04, the newscaster called Sen Kerry a liar. Even if he is a liar it is not for a newscaster to make that statement. The news should be presented and the public can make their minds as to the truth. XM satellite radio should be given the right to broadcast local weather, news, traffic reports whatever. Folks who choose to listen to them should have the right to hear about local situations such as tornados and traffic tie ups. If we don't have that freedom all we will get is the world according to Hilter or whoever has replaced him. People should be allowed to think on their own not what Rush is paid to have us think.
